50X1-HUM

1. The VEB Bergmann (Borsig)-Elektrizitätswerk, Berlin-Wilhelmsruh, Lindenallee, is working on a Soviet order for 12 cable making machines (Verseilmaschinen) with which cable 20 mm in diameter can be produced. The length of the machine is 25 meters. Large cast iron parts for the machines were delivered by the SAG Krupp-Gruson, Magdeburg.
2. Also on Soviet orders, the Bergmann plant is producing several-stage compressors of 160 atmospheres. Three-stage pumps, also of 160 atmospheres, are being produced on the same orders. The heavy cast iron parts were delivered by Krupp-Gruson.
3. In the boiler plant, four oil tanks, allegedly for fishing boats, are being produced per week. This order has already been running for four months.
4. Construction of the large turbine hall on the plant premises is going forward with the greatest speed, in three shifts. The steel structure is completed and partly under roof. As the first piece of equipment a large rotary lathe is to be installed and to begin operation.
5. The plant is guarded by German sea police, whose main administration is housed in neighboring buildings in the Lindenallee.
